What did the instructor do that helped you learn?

Comments
The only thing I really learned from is writing the discussion posts because I had to thoroughly read the book and think about what I was writing.
Emailed us about work before it was due every night.
Dr. Chen explained concepts very clearly and thoroughly in his lectures, while providing outside sources to help us gain mastery over our content.
Answered my questions promptly and accurately.

What could the instructor change about the course that would help you learn?

Comments
Stop timing the quizzes; I didn't even finish them sometimes due to lack of time. Most of the questions on the quizzes were not in his lectures, and extremely hard to find in the textbook, sometimes I think they weren't even there. The discussion posts take a long time to do, even if they are just 400 words. Two a week isn't impossible, but it is rough trying to get everything done and still see your family through the week. Normally what took me the most time (probably at least half of the time it took to write the post) was looking for another source to cite from. It was always time consuming; but sometimes it wasn't hard, and sometimes it was.

What other comments do you have about this course?

Comments
Very time consuming – which isn't necessarily a bad thing, but I feel like students should be prepared before they sign up for it. I don't think I would have survived this course if I took it in the fall or spring with 4–5 other courses. All your attention really needs to be on this one if you want to do good in it.
None. It was fantastic.
Great course!
